

The golden Kubernetes Tooling and helpers list	Short Description of the tool or helper	Comments
Argo CD <a href="https://argoproj.github.io/argo-cd/">https://argoproj.github.io/argo-cd/</a>	Argo CD is a declarative, GitOps continuous delivery tool for Kubernetes.	
AWS Kubernetes <a href="https://github.com/scholzi/terraform-aws-kubernetes">https://github.com/scholzi/terraform-aws-kubernetes</a>	AWS Kubernetes is a Kubernetes cluster deployed using Kubeadm tool	
eksctl <a href="https://github.com/weaveworks/eksctl">https://github.com/weaveworks/eksctl</a>	eksctl is a simple CLI tool for creating clusters on EKS	
inlets <a href="https://github.com/inlets/inlets">https://github.com/inlets/inlets</a>	Expose your local endpoints to the Internet	
jetstack cert-manager <a href="https://github.com/jetstack/cert-manager">https://github.com/jetstack/cert-manager</a>	cert-manager is a Kubernetes add-on to automate the management and issuance of TLS certificates	
k3s <a href="https://k3s.io/">https://k3s.io/</a>	Lightweight Kubernetes	
k3d <a href="https://github.com/rancher/k3d">https://github.com/rancher/k3d</a>	k3d is a very nice deployment tool to run k3s in docker	
k3sup □ (said 'ketchup') <a href="https://github.com/alexellis/k3sup">https://github.com/alexellis/k3sup</a>	k3sup is a light-weight utility to get from zero to KUBECONFIG with k3s on any local or remote VM	
K3s on vagrant <a href="http://devnetstack.com/kubernetes-the-easy-way-with-k3s/">http://devnetstack.com/kubernetes-the-easy-way-with-k3s/</a>	Kubernetes The Easy Way With K3s!	
k9s <a href="https://github.com/derailed/k9s">https://github.com/derailed/k9s</a>	K9s - Kubernetes CLI To Manage Your Clusters In Style!	
kasten <a href="https://kasten.io/">https://kasten.io/</a>	Application Backup and Recovery for Kubernetes	
kns <a href="https://github.com/blendle/kns">https://github.com/blendle/kns</a>	kns - quick Kubernetes Namespace Swicher	
KOPS <a href="https://github.com/kubernetes/kops">https://github.com/kubernetes/kops</a>	kops - Kubernetes Operations	
kubectx <a href="https://github.com/ahmetb/kubectx">https://github.com/ahmetb/kubectx</a>	Power tools for kubectl	
kubelogs <a href="https://github.com/eduardobaitello/kubelogs">https://github.com/eduardobaitello/kubelogs</a>	It is a bash script that uses your current kubectl context to interactively select namespaces and multiple pods to download logs from	
kube web view <a href="https://codeberg.org/hjacobs/kube-web-view/">https://codeberg.org/hjacobs/kube-web-view/</a>	Kubernetes Web View allows to list and view all Kubernetes resources ...	
kubefwd <a href="https://github.com/bxn2/kubefwd">https://github.com/bxn2/kubefwd</a>	Kubernetes port forwarding for local development	
Kubernetes Ingress Linklist <a href="https://gitlab.com/k187/kubernetes-ingress-linklist">https://gitlab.com/k187/kubernetes-ingress-linklist</a>	UI with a list of all available Kubernetes ingresses per namespace	
NextClipper <a href="https://github.com/NexClipper/NexClipper">https://github.com/NexClipper/NexClipper</a>	NexClipper is the container and container orchestration monitoring and performance management solution	
Octant <a href="https://github.com/vmware/octant">https://github.com/vmware/octant</a>	A web-based, highly extensible platform for developers...	
OpenEBS <a href="https://github.com/openebs/openebs">https://github.com/openebs/openebs</a>	Open Source Cloud Native Storage	
Polaris <a href="https://github.com/FairwindsOps/polaris">https://github.com/FairwindsOps/polaris</a>	Fairwinds' Polaris keeps your clusters sailing smoothly.	
Rancher Server <a href="https://github.com/rancher/rancher/tree/master/server">https://github.com/rancher/rancher/tree/master/server</a>	Heps to create and manage clusters anywhere via GUI or API	
ROOK <a href="https://rook.io/">https://rook.io/</a>	Open Source Cloud Native Storage	
TK8 <a href="https://github.com/kubernauts/tk8">https://github.com/kubernauts/tk8</a>	The Kubernauts TK8 cli which can do magic things	
MSB <a href="https://www.msb.com">https://www.msb.com</a>	Learn k8s with Nigel Poulton on real infra	
StorageOS <a href="https://storageos.com/">https://storageos.com/</a>	Cloud Native Storage (Open Core?)	
Velero <a href="https://velero.io/">https://velero.io/</a>	Kubernetes Backup and Restore	
Gardener <a href="https://github.com/gardener/gardener">https://github.com/gardener/gardener</a>	Kubernetes clusters as a service	
Kyma <a href="https://kyma-project.io/">https://kyma-project.io/</a>	A flexible and easy way to connect and extend enterprise applications in a cloud-native world	SAP open source
Kubeman <a href="https://github.com/walmartlabs/kubeman/">https://github.com/walmartlabs/kubeman/</a>	Kubeman is a tool that aims to provide an easy way to view information in Kubernetes clusters and investigate issues related to Kubernetes and Istio.	Walmart open source
Kubeone <a href="https://github.com/kubermatic/kubeone">https://github.com/kubermatic/kubeone</a>	kubeone is a CLI tool and a Go library for installing, managing, and upgrading Kubernetes High-Available (HA) clusters. It can be used on any cloud provider, on-prem or bare-metal cluster.	
Kubernetes Resource Report <a href="https://github.com/hjacobs/kube-resource-report/">https://github.com/hjacobs/kube-resource-report/</a>	Script to generate a HTML report of CPU/memory requests vs. usage	
Kubernetes Operational View <a href="https://github.com/hjacobs/kube-ops-view">https://github.com/hjacobs/kube-ops-view</a>	Provides a common operational picture for multiple Kubernetes clusters	
Open Policy Agent (OPA) <a href="https://www.openpolicyagent.org/">https://www.openpolicyagent.org/</a>	Open Policy Agent (OPA) is a general-purpose policy engine with uses ranging from authorization and admission control to data filtering.	
Typhoon K8s <a href="https://typhoon.psdn.io/">https://typhoon.psdn.io/</a>	A minimal and free Kubernetes distribution, you'd love it!	
kubectl bindrole <a href="https://github.com/Ladicle/kubectl-bindrole">https://github.com/Ladicle/kubectl-bindrole</a>	Finding Kubernetes Roles bound to a specified ServiceAccount, Group or User.	
litmus <a href="https://github.com/litmuschaos/litmus">https://github.com/litmuschaos/litmus</a>	Litmus is chaos engineering for workloads on Kubernetes	
kube2iam <a href="https://github.com/ibln/kube2iam">https://github.com/ibln/kube2iam</a>	Provide IAM credentials to containers running inside a kubernetes cluster based on annotations.	
Okteto <a href="https://github.com/okteto/okteto">https://github.com/okteto/okteto</a>	Dev tool for Kubernetes live development	
kone <a href="https://github.com/ibm/kone">https://github.com/ibm/kone</a>	Build and deploy Node.js application on Kubernetes	
tilt <a href="https://tilt.dev/">https://tilt.dev/</a>	Tilt for Kubernetes microservice dev. Automates 'docker build && docker push && kubectl apply'.	
ksniff <a href="https://github.com/eldadru/ksniff">https://github.com/eldadru/ksniff</a>	A kubectl plugin that utilize tcpdump and Wireshark to start a remote capture on any pod in your Kubernetes cluster.	
multipass-k3s-rancher <a href="https://github.com/arashkaffamanesh/multipass-k3s-rancher">https://github.com/arashkaffamanesh/multipass-k3s-rancher</a>	Rancher K3s, Rancher Server and RKE on Multipass VMs on your local machine for DevOps lovers	
The Awesome kubectl plugins <a href="https://github.com/shantanu/awesome-kubectl-plugins">https://github.com/shantanu/awesome-kubectl-plugins</a>	A curated list of awesome kubectl plugins inspired by the awesome list	
The kubernetes Icon Set <a href="https://github.com/kubernetes/community/tree/master/icons#kubernetes-icons-set">https://github.com/kubernetes/community/tree/master/icons#kubernetes-icons-set</a>	A set of Kubernetes architecture diagrams icons for presentations	
Eunomia <a href="https://github.com/KohlsTechnology/eunomia?utm_sq=g62h948ha">https://github.com/KohlsTechnology/eunomia?utm_sq=g62h948ha</a>	A GitOps Operator for Kubernetes	
kubectl-neat <a href="https://github.com/laysk/kubectl-neat">https://github.com/laysk/kubectl-neat</a>	Clean up Kubernetes yaml and json output to make it readable	
kubecd <a href="https://github.com/zedge/kubecd">https://github.com/zedge/kubecd</a>	Kubernetes Continuous Deployment Tool	
This sheet is maintained by Kubernauts and the Kommunität.		
If you'd like to suggest a tool or helper, please comment in a cell in the last row.		
If you'd like to join us on slack, please invite yourself via this link: <a href="https://kubernauts-slack-join.herokuapp.com/">https://kubernauts-slack-join.herokuapp.com/</a>
